

Visualizing Academic Growth for A Whole-School View

“Innovare was able to take the data that I presented to them and create a student profile that has not been able to be constructed in all of my 26 years of serving as an educator.”

- Takeshi James, Principal at Avalon Park

Q&A with Principal James

? How has Inno improved your school’s readiness to handle and interpret educational data?

Inno was able to capture the vision that I shared for the "At-a-Glance" data template that I wanted to share with my students, their families, and our teaching staff.

? In what ways has Inno supported your school in managing and securing student data?

Inno updates our data on a regular cadence and for that we are all grateful!

Innovare Empowers Educators With Data-Driven Insights

Secured Unified Data

No more scattered spreadsheets. We seintegrate with your systems to give you the full picture.

Actionable Insights

Take the guesswork out of strategic planning. Get powerful insights to make quick, empowered decisions.

Thought Partnership

Our partners lean on us for strategic leadership support and knowledge on best practices. You can too.

More Time, More Impact

There are better ways to use your time than spending hours managing your data. We've got you covered.

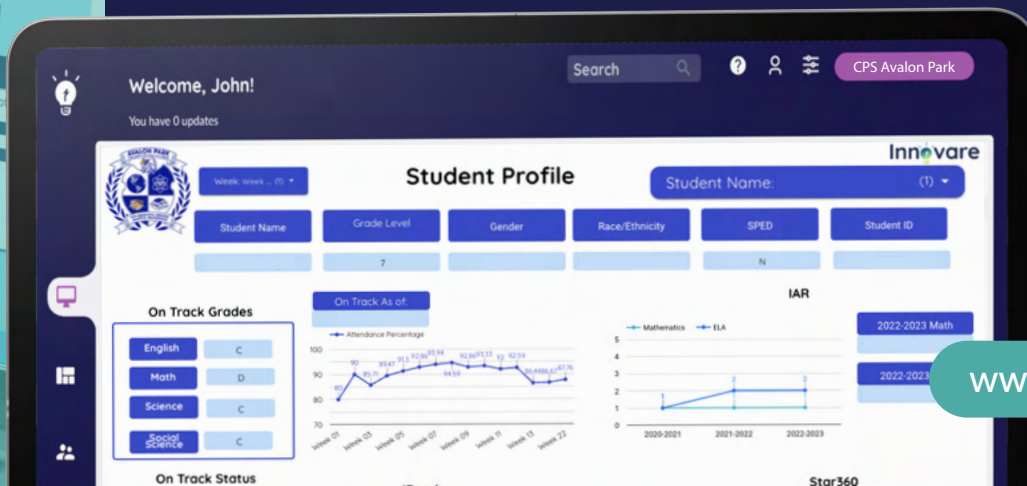

Avalon Park Success Story

Before Innovare, Principal James and her team were using separate spreadsheets to track data for each student, which quickly became tedious and time-consuming. Because of this, they were missing a whole school view.

Innovare teamed up with Avalon Park, empowering the team to make data-driven decisions that prioritized growth and boosted overall ELA and Math proficiency.

Principal James moved from tedious spreadsheets to:

-  Comprehensive school-wide data views
-  Student-level growth tracking
-  Multi-point data visualizations
